Importer of Building Products

About the Company

Observing the strong design trend for vanities made from furniture pieces retrofitted to become bathroom vanities, DFW Interiors sought to find a way to deliver the furniture look while simplifying the process. Prior to DFW Interiors, achieving the sought-after furniture style vanity meant shopping antique malls, finding a carpenter to carefully drill the holes through which to connect the plumbing, and finally working with a plumber and countertop supplier to achieve the final outcome. Today, for customers of DFW Interiors, the process is as simple as a visit to DFW Interiors showroom or its website to order vanities that come ready for installation—complete with the sinks and countertops installed and the holes pre-drilled to accommodate standard faucets.

DFW Interiors offers hundreds of styles, ranging from traditional to contemporary, in single- and double-vanities options. Sinks and granite tops reflect the latest in style options. For customers truly desiring one-stop shopping for a complete vanity, DFW Interiors also carries a selection of faucets, decorative mirrors, lighting products, and linen cabinets. DFW Interiors' rapidly growing clientele base now includes both residential and multi-family builders and designers.

Owner Verruschka Scheevel frequently travels the world to hand-select each of the top-quality furniture style vanities she imports to Dallas for distribution throughout the U.S. Artisans continually introduce new style options, and customers can even provide a photo or sketch of furniture items that clients want to emulate and have a high quality replica created for them.

Her world travels continually inspire the enterprising Verruschka as she expands her product offering and client base. Soon after DFW Interiors began importing chairs and tables, several large restaurants chains took notice and are now repeat customers. Outdoor furniture for hospitality industry clients has also caught on for home décor, adding another plus for builder and interiors designer clients.

Clients know DFW Interiors as the “go-to source” for and product they may dream of for a bathroom, kitchen, patio, restaurant, or just about anything they need made to their unique specifications for their home or business. DFW Interiors takes pride in its unparalleled pricing and service extended to all customers, DFW Interiors delivers knowledge, quality and products that suit the style and taste of a discrimination and ever-expanding client base.

Granite and Kitchen Cabinets

Granite countertops are unique in that no two pieces of granite are exactly the same and it adds a richness and texture to your home that is unmatched by any other granite product. The most common uses for granite today are vanity and kitchen countertops. Granite adds an interesting design element to your kitchen and is more durable than laminate countertops. Whether you are remodeling or involved with new construction, granite countertops will make a beautiful addition and increase the re-sale value of your home.

CABINETS

DFW Interiors offers affordable high-end kitchen cabinets. Each kitchen is built to order with many of color treatments and style options available. All solid wood construction and slow close drawer systems are standard on our cabinetry. Whatever your home style, you're sure to find a door to complement your décor.
